

THE 5 Ws OF EGG FREEZING

WHY

should I freeze my eggs?

Egg freezing allows you to plan and live your life on your own terms. You will continue to age but your eggs don't have to.

WHO

is a candidate for egg freezing?

Any woman who would like to take control of her future fertility options and preserve her fertility today.

WHERE

should I freeze my eggs?

You should freeze your eggs at a center with proven results from egg freezing. Remember, egg vitrification is much different than embryo vitrification. At OVA, we have babies born from eggs frozen in our lab and are experts in this fine-tuned technology.

WHAT

is egg freezing?

Egg Freezing, also known as Egg Vitrification, is the process of cryopreserving your eggs at a younger age so they can be used in the future.

WHEN

should I freeze my eggs?

The best time to consider egg freezing is between the ages of 25 and 35, but anytime is better than no time. Remember you are younger today than you'll ever be!
