Patient & Staff
Health Checks

Wipes & Sanitizer
Provided

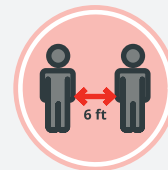

Increased Cleaning
& Sanitation

All Patients & Staff
Must Wear Face
Coverings

Consultations and Medication
Teach Sessions available by
Zoom

Social Distancing
6 Feet Apart

Please Do Your Part

Wash Your
Hands

Stay Home
When Sick

Wear a Face
Covering

- **OVA** will continue to follow guidance from the CDC and ASRM (American Society for Reproductive Medicine). We are staggering our monitoring and waiting rooms to provide appropriate physical and time distance.
- We will continue to screen all patients for exposure and risk factors for COVID-19. We will also complete no-contact temperature screening when you arrive at our office. If you have a fever (>100.4 F), we will ask you to leave and contact your primary care provider for further guidance.
- If a patient becomes quarantined or sick from COVID-19, their treatment will be cancelled. (if this happens, **OVA** as your partner, will allow you to roll treatment to a future month without any additional cycle charges. If you have already started medications you may need to replace any medications you have used up to the point of cancellation but we will help you order what you need at the lowest price through our pharmacy partners if needed.)
- Patients will need to come to our offices unaccompanied for all visits, including monitoring, ultrasounds, retrievals, and transfers. A member of the **OVA** team will be with you on-site for your retrieval or transfer.
- Our procedures are performed in dedicated rooms with sterile or disinfected equipment. One patient at a time, one room at a time. Procedure rooms are disinfected between cases.
- Patients must wear a face mask that covers their mouth and nose for all visits to an **OVA** office. Patients may not be seen for any form of testing, treatment, or consult without having a face covering.
